Data Analyst with experience in analyzing large-scale business data across Supply Chain and InsurTech domains using SQL, Power BI, Python, and Excel. Built data models, ETL workflows, KPI dashboards, and business reports to improve reporting accuracy and monitor operational performance.

SKILLS

- **Data Analysis:** SQL, Python, Pandas, NumPy, Excel, Statistical Analysis.
- **Data Visualization:** Power BI (DAX, Power Query), Data Modeling, KPI Reporting, Data Storytelling.
- **Database:** SQL Server, MySQL, Relational Databases, Query Optimization, Data Integrity.
- **Data Engineering:** ETL / ELT, Data Warehousing, Data Transformation, Data Pipelines, Data Validation.

EXPERIENCE

Data Quality Analyst | Nvest Solutions 08/2025 – 05/2026

- Analyzed 2M+ insurance records using SQL, uncovering variations in policy volumes, product performance, and reporting trends to highlight business performance gaps.
- Developed KPI dashboards in BI across 5+ insurance products, tracking policy volumes, premium trends, and product performance to give stakeholders a consolidated view of business KPIs.
- Translated Product and Business requirements into reports, improving reporting accuracy by 20% and establishing consistent metric definitions across teams.
- Diagnosed recurring reporting discrepancies using SQL, identifying inconsistent source fields and mismatched business definitions, helping teams improve data consistency and reduce reporting rework.

Associate Functional Consultant | SAPDS Technologies Pvt Ltd 12/2024 – 08/2025

- Extracted procurement, finance, sales, and equipment datasets within the SAP ERP system to deliver reliable reporting across 3+ business functions.
- Gathered requirements from procurement and finance users and configured SAP B1 purchasing flows (purchase request to PO, goods receipt, A/P invoice, outgoing payment) to match the client's approval process.
- Set up master data (business partners, items, chart of accounts) in SAP B1 and prepared data-migration templates, reconciling them against client source records and correcting mismatches before go-live.
- Facilitated cross-functional ERP enhancements that improved operational efficiency by 10% while strengthening reporting quality and business decision-making.

PROJECTS

Procurement Intelligence Hub | SQL | Power BI | DAX | ETL 05/2026 – 06/2026

- Engineered an end-to-end Procurement Intelligence Hub using SQL, Power BI, Power Query, and DAX to analyze 5M+ procurement records, improving spend visibility and supplier performance analysis.
- Built a Star Schema with 20+ DAX measures to automate spend analysis, payment aging, and procurement KPIs, streamlining monthly reporting from 8 hours to 2 hours.
- Delivered procurement insights by identifying supplier performance gaps and payment delays, driving faster procurement decisions and identifying cost-saving opportunities.

Customer Segmentation for Targeted Marketing | Python| Data Visualization 03/2026 – 04/2026

- Processed and analyzed 1M+ customer records using Python and Excel to uncover high-value customer segments through demographic, purchasing behavior, and spending pattern analysis.
- Transformed raw customer data into interactive dashboards by streamlining data preparation workflows, reducing manual analysis effort by 35%.
- Recommended targeted marketing strategies based on customer segment insights, supporting data-driven customer acquisition, retention, and campaign planning.

EDUCATION

Malla Reddy College of Engineering and Technology 08/2019 - 05/2023

B.Tech in Electronics and Communication Engineering
